Committee Reports

. . . Reading from Page 24

A new project this year is a Public Speaking Bureau. This work will be under the direction of Dr. Jonas Morris, of Audubon, N. J. May we suggest that each State Association appoint a committee now to put this over among their membership and be ready to act when Dr. Morris gives the word.

Supervision of newspaper publicity was handed to this committee at the last convention and this work is progressing under the direction of Mr. F. H. Sidney, National Publicity Director. Newspaper articles are being sent to the leading papers in every state. If you see these articles won't you please clip and send them in that we may be informed of the scope of publicity thus accomplished.

You can help by sending in your local programs. If they reach us sufficiently in advance of your meeting, we can probably get you publicity in your local papers that you cannot get for yourselves. Your co-operation will help us to help you.

C. P. BEACH, *Director*
